Inspection Chamber

Inspection Chambers

- ▶ Polypropylene Chamber and Riser unit
- ▶ Range of Recessed / Solid Top covers to suit
- ▶ Unique Chamber
- ▶ Robust Design
- ▶ Free Seals & Blanking plates

Riser

Inspection Chambers

CLKS 455 Riser 300mm (rise height) 340mm (overall height)
The grooves on the riser enable easier cutting if needed.

Base Unit

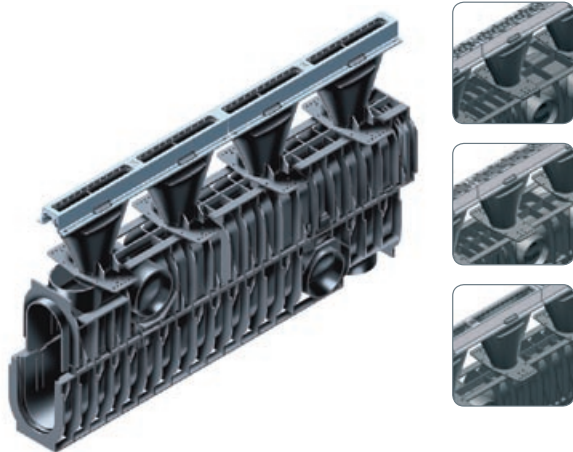

Inspection Chambers

One, two or three flows can be stopped by using the bungs and the blanking plates. The blanking plates reduce any waste being deposited in the unused inlet(s). The CLKS 453 comes with three bungs and three blanking plates. Suitable for pipes of 110mm O/D.

RECYFIX® HICAP®

Linear Channel Drainage

- ▶ High Capacity drainage system
- ▶ Suitable for all load classes
- ▶ Quick and easy to install
- ▶ Highly efficient
- ▶ Cost savings in the overall installation
- ▶ No separate gratings

Application areas

- ▶ Airports
- ▶ Car parks, Dockyards
- ▶ Industrial/ commercial areas
- ▶ Pedestrian areas
- ▶ Port installations
- ▶ Power stations
- ▶ Supermarkets

Slotted Channel

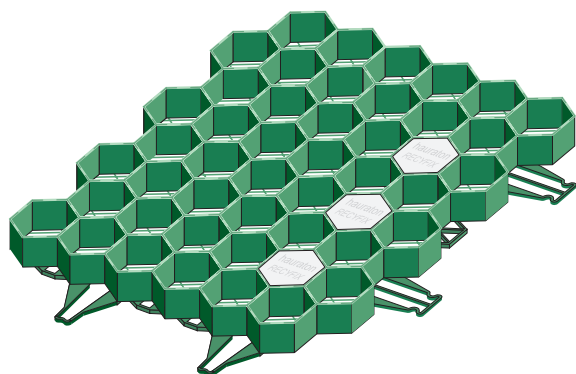

Linear Channel Drainage

- ▶ Slotted drainage channel to suit blocked-paved areas
- ▶ Hardly visible, an attractive option for pedestrian areas
- ▶ High drainage capabilities

RECYFIX®GREEN Standard

Permeable Surfaces

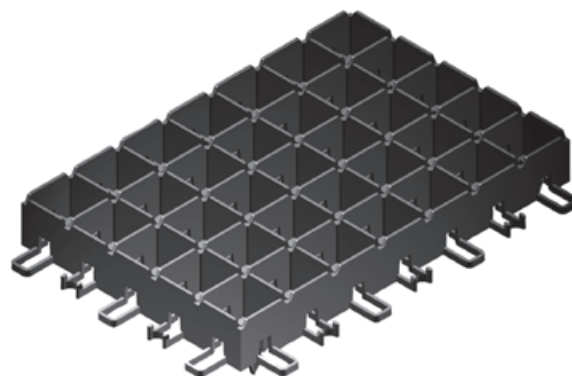

- ▶ Loading capacity 200 tons/m²
- ▶ Turf finished surface area of 90%
- ▶ Strengthens filtrated surfaces
- ▶ Protects against erosion
- ▶ Weather resistant
- ▶ Quick and easy to install

Application areas

- ▶ Green areas open to occasional traffic
- ▶ Car parks

RECYFIX®GREEN Super

Permeable Surfaces

- ▶ Loading capacity 400 tons/m²
- ▶ Extremely robust
- ▶ Strengthens filtrated surfaces
- ▶ Suitable for different filler materials
